Re: Little Park Water Company; Docket No. W-02192A-07-0326; Decision No. 70208
Partial Compliance Filing

Dear Ms. Kilger:

The Subject Decision, as supplemented by Decision No. 70612 dated November 19, 2008, required, among other things, that the Company file an Arizona Department of Environmental Quality Approval of Construct (an "AOC") for the Arsenic Treatment Plants to be constructed at its Well Sites #1 and #2. The Company has obtained that AOC for Well Site #1, 15 copies of which are attached hereto.

The Company believes it will receive the AOC for Well Site #2 in the near future and will file that upon receipt.

In the event you have any request is regarding this matter, please do not hesitate to contact Steve Gudovic at the Company or the undersigned.

Sincerely,

Richard L. Sallquist

ATTACHMENT C
APPROVAL OF CONSTRUCTION
(APPROVAL TO OPERATE)

1. This approval is based solely on the engineer's certification in the Engineer's Certificate of Completion that construction of this system complies with the key elements of the approved plans and the ADEQ minimum design and construction standards contained in statute, rule or referenced codes.
2. The Department cannot assure that conditions and requirements specified by state regulations, guidelines, or in the approved plans have been met. This Approval should not be construed or implied as a guarantee or warranty of the quality of construction or accuracy of dimensions nor does this Approval in any way relieve any other party from meeting requirements or obligations imposed by contract or any other means, including commonly accepted industry practices.

The Department or its employees assume no responsibility for, nor is the owner, contractor or any other party relieved of any legal obligations or responsibility for compliance with applicable laws or the Approval to Construct by virtue of this Approval.

This approval shall be null and void if an undiscovered defect or omission in manufacturing, design, installation or operation is in violation of the key elements of the approved as-built plans, applicable laws, rules, regulations, bulletins, or the Approval to Construct. Upon discovery of said defect, the Department may require the project owner to submit plans to correct the defect, and then correction.

3. Project Storm Water Pollution Prevention Plan (SWPPP) shall remain operational until all areas of the construction site, not otherwise covered by permanent pavement or structure, have been stabilized with a uniform perennial vegetative cover with a density of 70% (of ambient) or equivalent measures have been employed (final stabilization & Notice of Termination).
4. Monitor the arsenic removal process according to the following schedule:
 - a. Week 1 – One raw water and one treated water sample, daily, Monday through Friday (total ten samples per week, at least one by certified lab);
 - b. Week 2, 3 and 4 – One raw water and one treated water sample twice per week (total four samples per week, at least one day by certified lab); and
 - c. Months 2 and 3 - One raw water and one treated water sample per month (total two samples per month, both by certified lab).
 - d. Quarterly for the life of the plant.
